I SPY CHRISTMAS

Find all the Christmas objects and count them!

Reindeer, also known as caribou in North America, are remarkable creatures with unique adaptations and cultural significance. Here are some interesting facts about them.

Both genders have antlers: Unlike most deer species, both male and female reindeer grow antlers. Males typically shed their antlers in November, while females lose theirs in May after giving birth. This unique trait allows females to use their antlers to dig for food under the snow during winter.

Adaptations for Cold: Reindeer have a double coat of fur that keeps them warm in frigid temperatures. The outer layer consists of long, hollow guard hairs that trap air, providing insulation, while the inner layer is a fine, woolly undercoat.

Cultural Significance: Reindeer have been an integral part of the culture and livelihood of many Arctic peoples for thousands of years. They are herded for their meat, milk, and hides, and play a vital role in the traditions and economies of indigenous communities in regions like Scandinavia and Siberia.

Quick Snow Ice Cream Recipe

Ingredients

BASE MIXTURE

- 1 cup milk (any type works)
- 1/3 cup granulated white sugar
- 1 teaspoon vanilla extract
- 8 cups clean snow or shaved ice (amount may vary based on snow density)
- Sprinkles for topping (optional)
- 1 pinch fine sea salt

Instructions

In a large bowl, whisk together milk, sugar, vanilla, and salt until completely combined.

Collect fresh, clean snow and immediately stir it into the milk mixture until you reach a fluffy, not runny, consistency.

Top with sprinkles if desired and serve immediately - it melts quickly!

Use fresh snow at your own risk • Consume immediately as this melts very quickly
Amount of snow needed may vary depending on snow density

SNOW GAMES AND ACTIVITIES

SNOWBALL TOSS: Set up targets like buckets or cones and take turns tossing soft snowballs or foam balls at them. Assign point values for different distances to make it competitive.

SNOW BASEBALL: Create a baseball diamond using snow mounds for bases. Use snowballs as the baseball and see who can knock down targets set on the bases with the fewest pitches.

SNOW GOLF: Smooth out a fairway and create a hole using an open can buried in the snow. Use hockey pucks as golf balls and hockey sticks or real golf clubs to play.

FOOTPRINT TAG: Play tag but only step in other's footprints, adding a new twist to the classic game.
